|----------------------|---------------|
| <b>Date</b>          | 5 July 2026   |
| <b>Team ID</b>       |               |
| <b>Project Name</b>  | Rising Waters |
| <b>Maximum Marks</b> | 1 Mark        |

### Communication Plan:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used within the team and with stakeholders throughout the project lifecycle, including how updates, issues and feedback were managed.

| S.No | Communication Type     | Frequency | Channel / Tool                | Participants        | Purpose                                               |
|------|------------------------|-----------|-------------------------------|---------------------|-------------------------------------------------------|
| 1    | Team Standup           | Daily     | Google Meet                   | Team Leader         | Discuss daily tasks and progress                      |
| 2    | Progress Update        | Weekly    | Google Meet                   | Team & Mentor       | Review project progress and receive feedback          |
| 3    | Issue / Bug Discussion | As Needed | WhatsApp / VS Code Live Share | Team Leader         | Resolve coding and technical issues                   |
| 4    | Stakeholder Review     | Bi-Weekly | Google Meet                   | Team Leader & Guide | Demonstrate completed modules and collect suggestions |
| 5    | Final Demo Rehearsal   | Once      | Google Meet                   | Team leader         | Practice the final project presentation               |
| 6    | Project Submission     | Once      | SmartBridge Portal            | Team Leader         | Submit the final project and documentation            |

### Communication Challenges & Resolutions:

| S.No | Challenge Faced                                                                                 | Resolution / Action Taken                                                                                        |
|------|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------|
| 1    | Integrating the Machine Learning model with the Flask web application was challenging.          | Corrected model file paths, ensured proper model loading and performed comprehensive integration testing.        |
| 2    | The application's interface had layout and responsiveness issues across different screen sizes. | Refined the HTML and CSS structure to enhance responsiveness, alignment and overall user experience.             |
| 3    | Errors occurred during prediction execution and application deployment.                         | Verified input validation, resolved runtime issues, conducted local testing and completed successful deployment. |
